

Music and Drama Festival Features Varied Talent

Irma Sub Local ATA held a very successful music and drama festival in the Irma School April 10. This was the first festival in Irma and the first non competitive festival in the Wainwright Division.

In this type of festival there are no prizes awarded, each room entered receives a certificate to show the class entered, which is signed by the adjudicator for that class. It is expected that each teacher will arrange for every pupil to participate.

The program of the Irma Festival was as follows:

Glenholm School, Teacher Mrs. Prosser. Play "With the Help of the Family." Choral Speech, "Wheels."

Metropolitan School, Teacher Mrs. Likness. Singing, "Grasshopper Green." Elocution, "The Runaway." Education Point, Teacher Miss McCullough. Singing, Division 1. Folk Dancing.

Orbisdale School, Teacher Mrs. Ballentyne. Singing, Div. 2, "Tune-ful Guitar." Choral Speech, Div. 2.

Irma School, grade 1, Miss Touchette. Action Song, "The Rheumatism." Rhythmic Exercises, "Clap Alone and Clap Together."

Grade 2, Mrs. Glasgow. Play, "The Easter Egg King." Song, "Rocking."

Grades 3 and 4, Mrs. Chase. Play "Countess of Dufferin." Drill, "Star and Hoboes."

Grades 4 and 5, Mrs. Murray. Play "King Richard Comes to Sherwood." Choral Speech.

Grades 6 and 7, Mrs. Darks. Song, Folk Dance.

Grades 8 and 9, Mrs. Sather. Play "Uncle Joe's Will." Elocution.

From the above, one item was chosen from each room for an evening program.

Action Song, "The Rheumatism." Play, "King Richard Comes to Sherwood."

Drill, "Star and Hoboes." Play, "The Easter Egg King."

Folk Dance, and, Irma. Choral Speech, "Wheels."

Choral Singing, "Tune-ful Guitar." Choral Singing, "Grasshopper Green."

Elocution, "The Runaway." Rhythm Band, Metropolitan.

Folk Dance, Education Point. Remarks and distribution of certificates by Mr. Lindstedt.

Play, "Uncle Joe's Will."

In the intermissions between items during the day, Mrs. Rogers adjudicated the musical numbers and Miss Nelson the Drama. The comments of these two very talented ladies were most helpful and much appreciated. We are very fortunate to have the services of these well trained and capable people who come to us at a moderate expense from Edmonton.

Because of the flu and measles epidemic two schools were unable to attend. We are sorry teachers and pupils, and hope you will be able to take part another time.

The Irma Sub Local ATA wishes to extend thanks to all the people of the community for their interest and appreciation, to all the teachers for their efforts and splendid co-operation throughout, to Mr. Jones our janitor for the extra load he cheerfully carried, to the ladies who helped with the hot lunch, to any others who gave a helping hand and a special thank you to the high school helpers who kept things running smoothly and kept running willingly whenever we called. Thank you, boys and girls, we surely appreciate it.

Children With Matches
Set Grass Fires

About 12:30 noon on Wednesday, children playing with matches on the grounds set fire to brush and grass. A big blaze was soon burning and only prompt action on the part of the townsmen was all that prevented a serious fire.

Children have also caused a recent fire along the highway, and last winter started one in the wall of the skating rink. Do our small fry need stern preventive measures in regard to fire?

Village Council Has Busy Session

Minutes of the Council meeting of the Village of Irma on the 10th day of April in the Village office at 8 p.m.

Councillors present: W. Symington, F. A. Fuder, W. N. Frickleton.

Mayor Frickleton in the Chair.

Minutes of the previous monthly meeting were read and on the motion of W. Symington were adopted as written.

Unfinished business.

Refund Minimum Tax 1951 re: D. H. Gunn. Tax receipt dated Dec. 31, 1951, Town of Fort Sask. No. 2937, presented.

Symington—that we refund Minimum Tax charged Mr. Gunn to the amount of \$8.00 for 1951.

Following correspondence dealt with.

CNR re Park Lots, filed.

Nadon Faving Co. re Sidewalk construction, filed.

Union of Alberta Municipalities re Municipal Assistant Act, filed.

YWCA re Grant for building campaign, tabled.

Trans-Canada Highway re Yellowhead Road, filed.

NWU Ltd. re Operating Base, filed.

Health and Recreation. Dept. of Education re Playground Leaders Short Course, filed.

Deputy Minister of Municipal Affairs re approval of A. C. Charter as Assessor for Annual Assessment, tabled.

Dept. of Public Health re establishing MD No. 73, MD 61, part of MD 62 and part of MD 72 including Town and Villages.

Fuder—that we obtain further information thereon.

Deputation from Irma and District Board of Trade. Messrs. A. C. Archibald and Ronald Thurston were present and requested information regarding availability of building sites in the Village for residential purposes. Deputation was informed that while certain acreages had been surveyed in 1951, these had as yet not been completed by the Land Titles office. It is understood that more lots will be available in the Village as soon as the various owners receive their new titles.

Fuder—that we request property owners to clean up their property by the removal of all garbage thereon and notice be inserted in the Irma Times to this effect.

Council discussed the matter of pre school children playing on the roads, thus creating a very real hazard to themselves and also vehicle traffic thereon.

It was decided to request parents and guardians to endeavour to stop these children from this dangerous practice. Notice to be inserted in Irma Times for co-operation of parents and guardians in this matter.

Mr. A. C. Milne for the Irma Curling Club requested permission to extend the club building to the south to enable the club to put in another sheet of ice. It was agreed that the Council meet Mr. Milne in regard to this matter on Friday, April 11 at the hour of 10 a.m. at the rink.

Financial Statement.

Municipal Receipts March \$369.83. Disbursements \$2282.58. Municipal balance \$3717.50. Cemetery Trust \$206.42. Agricultural Trust \$304.48.

Frickleton—that statement be accepted and that following accounts be passed for payment, amounting to \$281.00.

Fuder—adjourn.

Card of Thanks

I would like to give my sincerest thanks to the Senior and Junior Ladies Aid for the lovely plant and card of get well wishes. Also the Sharon Ladies Aid. I would also like to thank the many people with their kind acts in visiting me.

—Sophie O'Leary

Curlers Social In Kiefer's Hall Monday, April 21

All curlers and their wives or girl friends, husbands, or boy friends, are requested to attend. Card party to commence at 8:30 p.m. followed by lunch.

Short entertainment will conclude the evening.

EASTER TEA HELD BY SENIOR U.C.W.A.

The hall was tastefully decorated with carnations and daffodils when the Irma United Church Senior U.C.W.A. held their annual Easter Tea on Saturday last.

Mrs. M. Tripp, Mrs. L. Gulliver, Mrs. R. McFarland and Mrs. M. Enger received the guests.

Those who poured tea were Mrs. H. W. Ingalls assisted by Mrs. E. Fenton and cutting the loaf were Mrs. S. Brown, Mrs. V. Hutchison and Mrs. R. D. Smallwood. Servers were the Misses Olga Hlynka, Pat Milne and Marion Lovig.

In charge of the home cooking table were Mrs. M. Knudson and Mrs. I. S. Reeds. Assisting at the Mission Band table were Mrs. W. Sanders and Mrs. C. Anquist.

A very successful afternoon was held and the sponsors wish to say thanks to all those who assisted in any way.

Easterly Echoes

Miss Margaret Steele has returned to Calgary to resume her nursing studies. Other relatives that attended the funeral of Mr. Clark Steele from Calgary were Mr. Wm. Walker and Mr. and Mrs. Murray Walker from Edmonton, Mr. Eric Steele and from Wainwright, Mrs. Wm. Steele, Chrissie, Ken, Bill and Jack.

Mr. and Mrs. Stuart Fenton are attending the Calgary Stock Show and Sale this week.

Mr. and Mrs. Gordon Fenton, Valda, Ronald and Leonard are temporary residents of the district once again.

Southern Sayings

Mr. and Mrs. J. Jackson were Easter week-end visitors at Red Deer and this week Mr. Jackson is going to Edmonton.

Folks of the district all knew Mr. J. Hearn and will be sorry to hear that he is in the hospital in Edmonton again.

Mr. M. Creasey is in the Wainwright hospital and a speedy recovery is wished.

Mr. and Mrs. Bill Veer and family of Calgary were Easter visitors at Mr. and Mrs. P. Funks.

Mr. Harry Long is a visitor to Calgary attending the Stock Show and Sale.

Faye Reber is at Hardisty spending the Easter holidays with her cousins and grandparents, Mr. and Mrs. W. E. Reber.

Glen-Coa Gleanings

Mrs. A. James is spending the holidays in Edmonton.

Miss Arlene Steffensen was home over the Easter week-end.

Mrs. F. Withall and Francis have been to Gwynne to visit Mr. and Mrs. Stan Berg and family.

Glenholm school pupils are to be commended on their performance at the Music Festival in spite of the absence of their teacher Mrs. Prosser through illness. We all sincerely hope Mrs. Prosser is much better and able to resume her teaching duties at Glenholm after Easter.

Quite a number have been ill lately. We certainly hope that the fine weather will soon help to make everyone fit and well again.

Sharon Ladies Aid will meet at Mrs. P. Nilsson's on Thursday, April 24.

The farmers are beginning to get a determined look in their eyes these days. Threshing and combining will soon be going in full swing once more. May we all be more fortunate this coming fall in getting the harvest finished in the proper season.

Funeral Services Held For Clark M. Steele

Clark McMillan Steele was born in Vars, Ont., on December 7, 1900, and came west with his parents to Irma, Alberta, 16 years ago.

There he continued to reside, making a host of friends until his sudden passing on April 4.

The late Mr. Steele was a good athlete and keenly interested in sport of all kinds. This kept him young at heart and the young folk of this district could always look to him for encouragement and support.

He leaves to mourn his loss his loving wife, the former Jane Walker, and their three children, one daughter, Margaret of Calgary, and two sons, Clark and Keith at home.

Also three sisters, Mrs. J. Wakefield of Fabyan, Mrs. I. C. Knudson of Irma and Mrs. R. R. Deans of Toronto.

Funeral services were held from the Irma United Church with the Rev. H. W. Ingalls officiating. Interment was made in the Irma cemetery.

"Too Many Relatives" Plays to Packed House In Edgerton

When the members of the Junior Grain Club play "Too Many Relatives" journey to Edgerton on Wed. April 9, they met with a most enthusiastic reception from a packed house. And once more, as in Irma, they very regretfully had to close the doors with an estimated one third of the audience unable to get inside.

Those who did see the play made up as receptive and heart-warming a crowd as any cast could ever ask for and the Junior Grain Cubbers gave forth of their best.

The set up of the stage seemed just made to order and all in all the Irma players felt they were walking in a dream come true.

Just made to order and all in all the Irma players felt they were walking in a dream come true.

Silver Wedding Anniversary Proves Happy Event

A silver wedding anniversary of Mr. and Mrs. J. Clidell was royally celebrated last week-end, first on Saturday evening when about twenty-two friends and neighbors arrived together for a surprise party. One of the jolliest evenings ever was spent with games, chats, etc. Then on behalf of those present Mrs. C. L. Currie presented the bride and groom of 25 years with a handsome gift. Mr. Clidell replied for himself and his wife and warmly expressed their thanks. A beautiful lunch brought this happy occasion to a close.

Then on Sunday Mr. and Mrs. Clidell and family, Mr. and Mrs. Adams, Mrs. M. Nicholson, Mrs. DePraine, Mr. and Mrs. C. Brown and family sat down to a dinner featuring two roast turkeys with all the trimmings.

Then on Sunday Mr. and Mrs. Clidell and family, Mr. and Mrs. Adams, Mrs. M. Nicholson, Mrs. DePraine, Mr. and Mrs. C. Brown and family sat down to a dinner featuring two roast turkeys with all the trimmings.

The School Trustee

SCHOOL TAXES FORM a considerable part of the tax bill of most Canadian property owners, and whether they are actively interested in education or not, the operation of the schools in their community should be a matter of concern to them. While the taxpayer should, and very often does, show interest in the schools and give additional help and support when it is needed, it is the school trustees who carry the responsibility for the operation of the schools, the hiring of staff and other important matters affecting education in the community. An elected body, the trustees are often the object of criticism but they are almost always men and women who are sincerely interested in the schools and anxious to do their best for the pupils in their districts.

Agree Teacher Is Important

At the annual meeting of the Canadian School Trustees Association, held recently in Saskatoon, problems connected with their work were discussed by representatives of seven provinces. They agreed that the teacher is the most important factor in successful education and that fine school buildings and equipment are secondary to good teachers in providing a good education for children. The importance of maintaining standards of education rather than reducing taxes at the expense of the welfare of the school was also discussed, as was the need for trustees to be familiar with educational problems, and with the social problems connected with youth in their communities.

Are Interested In Problems

People who are interested in education will for the most part agree with the opinions of the trustees in these matters. No matter how fine a school building may be or how much expensive equipment is provided, a poor teacher cannot educate the child. If there must be a choice between building expensive schools or paying salaries which will attract able teachers there is no doubt but that the choice should be for the good teacher. It would be ideal to have both, and in many places this is possible, but it is no doubt often the lot of the trustee to make decisions of this kind. It is interesting to learn the views the Canadian school trustees are taking on this and other problems connected with education at this time.

Farmers Advised To Use Licenced Canadian Wheat

WINNIPEG.—A plea to Manitoba farmers to maintain the high quality of Canadian wheat in world markets by growing licenced varieties was issued by agronomists of the Manitoba department of agriculture.

They issued an article by Dr. J. A. Anderson, chief chemist of the board of grain commissioners, which listed these varieties as recommended for Manitoba:

Red Spring wheat—Lise, Redman, Thatcher, Regent, and in northern areas, Saunders.

Durum — Stewart, Mindum and Carleton.

Dr. Anderson said the quality of Canadian wheat would be destroyed if many farmers decided to grow unlicensed varieties. The average baking quality of wheat exported by Canada would suffer, and it would begin to lose its reputation and premium position on world markets.

Some farmers, he said, still grow unlicensed varieties imported from the United States and other countries. The American variety "Mida" was the commonest "off-fender."

Yet in Canada, Mida cannot grade above No. 3. Northern wheat, on the other hand, is not more than three per cent. of this wheat in a carlot of a licenced variety which otherwise would grade No. 1 or No. 2 was enough to bring the grade for the whole car down to No. 3.

Emily Kimbrough Compares Blue Bonnet — It's Her Favorite!

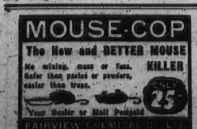

Accept an invitation from Emily Kimbrough, Compare Blue Bonnet Margarine with any spread at any price. Like the author and let others, you'll love Blue Bonnet's fresh, sweet flavor which nutritionally economy! Blue Bonnet is Canada's fine quality all-vegetable margarine. Use Blue Bonnet in cooking, on vegetables, as a delicious spread. Buy Blue Bonnet and get "all three" — Flavor! Nutrition! Economy!

Blue Bonnet Margarine is sold in two types—regular country package with color water, and also in the famous YELLOW QUICK bag for fast, easy color. BT-18

Now Many Wear FALSE TEETH

With More Comfort

PASTETIN, a clean, effective (non-toxic) powder, holds false teeth more firmly. So fast, so easy to use. No more pain. Just sprinkle a little PASTETIN on your teeth. No more sore, red, chapped or swollen gums. Get PASTETIN at any drug store.

Saltcoats' Gift To Saltcoats

When former Saltcoats, Sask., residents, Dr. and Mrs. J. B. Morrison—now with the Canadian Emigration Dept. in Glasgow—visited the Scottish Saltcoats, recently, they were given a civic reception by Provost Gourlay and presented with a plaque to be delivered to the mayor of their home town in Saskatchewan.

SUGGESTS ROCKET FLAX FOR BROWN, BLACK SOILS

Rocket flax has given good results throughout a wide area and is now recommended for all the brown, dark brown, and most of the black soil zones of Saskatchewan, a federal department of agriculture information service release said.

It is not recommended for the grey wooded soils nor the North Battleford-Lloydminster areas due to the short frost-free period. Dakota and Redwing varieties are recommended where the short season is a factor.

Rocket flax, as well as being high yielding, is rust-resistant and moderately wilt-resistant. Compared to Royal, it is slightly earlier, matures more evenly and has a larger seed with higher oil content and quality.

BUYS SHORTHORN BULL
CALGARY.—A. R. (Sandy) Cross of Calgary paid \$29,400 at a recent sale in Perth, Scotland for a fine Shorthorn bull.

North and South America were named for Amerigo Vesputi, the explorer.

PEGGY

SO LONG! I'LL BE HOME BEFORE ZERO HOUR!

DON'T! AM I SEEING THOSE LIPS AND GOING TO PEGGY WITH HER HAIR IN CLOTHES—AND NO MAKEUP!

THEY'RE JUST LIKE ME! I'VE GOT TO GO TO A LITTLE PARTY!

NOT LIKE THAT! LIKE THEY WERE!

WERE? YES, LIKE THEY WERE! I'VE CALLED AND INVITED THEM TO THE "SCALES & VICE PARTY TONIGHT!"

MOUSE CUP

The New and BETTER MOUSE KILLER

It's active, sure or sure. Better than poisons or poisons, easier than traps.

25

Mouse Cup is sold by all drug stores.

FAIRVIEW

Triplets' Names Came Naturally

Meteor, Monarch and Mercury are the names given to these three triplet calves born on the farm of Joseph Wickson, reeve of Trafalgar township, Ont. They were named after the three Ford Co. products in honor of the new plant being built in Trafalgar. Triple calves occur once in 100,000 births.—Central Press Canadian.

GORDIE HOWE, of the Detroit Red Wings, won the NHL scoring championship for the second straight year. The starry rightwinger tallied 47 goals and 39 assists during his own record total of 86 points which he established last season.

Patterns Morning Glories

by Alice Bruck

GLAMORIZE the bed with this new linen set! It's easy and quick, embroidery plus ready-made eyelet ruffling. The eyelet can match one of the colors in the embroidery if you like!

Pattern 7271; transfer, one motif 6 1/2 x 2 1/2; two 5 1/2 x 1 1/2 inches. To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Household Arts Department, Winnipeg Newspaper Union, 58 Front Street W., Toronto.

NINETY-ONE illustrations of patterns of your favorite needlecraft designs, plus SIX easy-to-do patterns printed right in the book.

Funny and Otherwise

A woman answered the bell on her front door and found a small boy standing there with a bow and arrow in his hand.

"Lady," he said pleadingly, "can I have my other arrow?"

"Yes," agreed the housewife kindly, "if I can get it for you. Where is it?"

The boy studied his toes for a long moment. Finally he spoke. "It's stuck in your cat."

Prof. "Name the outstanding accomplishment of the Romans."

Student: "They understood Latin."

Judy: "Why did you ever marry such an awful man?"

Janie: "He asked me, dearie."

"Why on earth do you keep pulling that ridiculous face?"

"The doctor told me to keep smiling and keep a stiff upper lip."

A man who had retired to a sleepy little village on the shores of the Pacific was very fond of fishing off the little pier near his home. One day he found himself right next to a juvenile angler.

"How's it going, sonny?" he asked.

"Have you caught anything yet?"

"Now," answered the boy. "I had one on the hook a while ago, but he unbait and divi."

During some particularly tough training, the men in a parachute battalion went to an officer with a complaint. "It's the new cook, sir," they explained; "he's trying to make us soft. Every time we have boiled barley wire for dinner he puts sugar in it."

"Darling," said the sentimental young man, "wouldn't you like to sail away on a silvery moonbeam—just you and me together—towards those twinkling stars where all is infinite, even love. And we could dwell in eternal bliss far from—" "Oh, I couldn't Jimmy—not tomorrow," interrupted the girl. "I have an appointment with my hairdresser at four."

A lovelorn sailor decided to celebrate pay day by sending a telegram to his girl. After chewing on the pencil several minutes he finally handed the message to the clerk which read, "I love you, I love you, I love you."

The clerk read it said, "You are allowed an additional word for the same price."

The sailor pondered a minute then added, "Regards."

HOW TO RELIEVE MUSCULAR PAINS

Warm affected parts. Rub in with oil. Keep covered with warm band. At druggist for 25¢.

DR. THOMAS' ELECTRIC OIL

VEGETARIANS

Kangaroos are gregarious and live in bands of 20 to 50. They are entirely vegetarian and do most of their browsing in the early morning, at dusk or by moonlight; mid-day is given to rest and play.

2880

—By Chuck Thurston

MOOSE POPULATION IN SASK. INCREASING

REGINA.—The moose population of Saskatchewan, which reached an all-time low six years ago, now is again on the upswing. Provincial game supervisor Harold Reid reported the conservation program initiated by the government "is slowly but surely bringing them back."

SPEAKER'S SYMBOL

VICTORIA, B.C.—A beautifully carved Indian "talking-stick" has been presented to Lieutenant-Governor Clarence Wallace by Chief William Skow. The custom is to place the stick in the ground in front of the chief when he wants to address the tribe.

LANGFORD, B.C.—A Langford cabinet maker intends to devote his spare time in the next 12 years to carving on wood the history of a Canadian era.

Copenhagen-born Kaj Nelson came to Canada 25 years ago and brought with him the desire to study the history of his new home. He finally decided that the Hudson's Bay company and its explorers provided "the most colorful history in Canada."

Several years later he chose to put these stories on wood.

He completed the first 30 carvings after three months of work. It shows a scene of a battle in Hudson Bay in 1697 between three British ships and a French vessel.

Nelson said that it would take him about 12 years to complete all the 36 carvings.

At The Diversified Business Run By Local Lumber Merchants

A new Canadian settler of 1880 set forth in his journal a description of the average prairie home of that time as a "dwelling of logs; hewn smooth on both sides, then well plastered between the logs." "Under the floor of each house," he wrote, "is a cellar for storage of root crops for winter use."

He and his family were given temporary shelter in the upper part of a friend's shanty. This "upper part" was in reality a lumber loft.

He and his sons drew logs for their own home and learned the rest of their lumber by ox-drawn cart across country twenty miles to and from the nearest navigable river where it was unloaded by steamer. There was no sawmill in the area.

He was unable to plaster his new home before the frost set in. Consequently the "thermometer frequently fell to 30 below in our bedroom."

"My little daughter," he wrote, "used to get up in the morning with her hair all frozen."

Not all settlers were so luckless, nor did he consider himself so. His experience was not unusual. There was just enough comfort for endurance and there was no granger in the early years.

The Canadian Pacific railway was shortly afterwards under construction westward out of Winnipeg. In each of the settlements it created, lumber yards sprang up to provide a focal point for building materials needed in the construction of new homes. By river and rail from the sawmills, lumber headed for the yards.

These lumber centres were a great boon to settlers for they could buy boards in varying lengths and purchase at the same time, their shingles, lath, building paper, sash and doors.

Until about 1925 the lumber merchant continued to confine himself fairly strictly to the sale of lumber when he started to add nails, hinges and other builder's hardware to his stock.

Since then he has brought in new building materials, some totally unrelated in composition to lumber but used in equal measure for construction.

Today the settler who hailed his own logs would stand astonished at the variety of building materials he could procure within his own community through a lumber merchant.

He could get a great deal more than lumber. The lumber yard of today runs a diversified business in building products where lumber sales often count for less than 50 per cent. The wide variety of uses, to which new building products are put, would be his head spin.

He could still get his two-by-fours and sixes.

There would be plenty of lumber—large stacks of spruce from northern Alberta, Saskatchewan and Manitoba, larch and hemlock from the interior of British Columbia and the Canadian Rockies, Douglas fir, cedar shingles and finishing woods of cedar and fir from the Pacific coast. All would be piled in the yard and ready to go into construction and remodelling of homes, barns and community buildings.

But he would find alongside them in large measure, new materials working improvements he would find incredible.

To insulate his home, he could buy

shavings, spun glass, asbestos wool or a special preparation of dried moss to stuff between walls and under the roof to prevent loss of heat. To prevent moisture condensation from rotting his walls and paint peeling off the sides of his house under a hot sun, he could buy a new product called vapor-seal paper.

He could finish the outside of his house with lumber, stucco, or a composition siding of asbestos that looked like stone or brick and could be rolled on. Or he could roll on an asphalt sheathing with a special barbed nail to hold it tight. Both these composite materials would give added insulation.

For his roof he could get cedar shingles. But, in addition, he could buy shingles made of asbestos or dry felt saturated with asphalt and some-what finished with colored granules that would give a slate surface effect. His shingles would never require painting and because they were fire-proof, would also give him a slight reduction in the insurance rate on his house.

To finish the inside of his home, he would find plaster and wallpaper. But he would also find a plaster board made of pressed paper finished with a thin layer of plaster which he could apply himself.

He would see a new craze for picture windows, large windows bringing in the picture of pleasant outdoor scenery into his living room. Some would be double-glazed windows, two panes of glass sealed into a single unit providing insulation, preventing frosting or fogging, and doing away with condensation.

If he caught on completely with the modern trend, he could buy glass blocks for his basement windows, his kitchen and around his doorways.

For his ceiling and walls he could use panels of brushed wood or soft colors. For his floors he could use asphalt or rubber tiles, the latter as quiet underfoot as a deeply carpeted floor.

He would find plywood used in doors, sub-floors, wall-panelling and cupboards.

His chimney, he could have custom-built of metal. For his bathroom and community buildings, he would find the lumber merchant had stocked acoustic tiles and panels used in ceilings to cut down on sound and noise.

If he decided to build a granary, he would find the lumber merchant ready to present his rafters, list every class of material needed and give him an overall price. He would get a free blueprint into the bargain.

Finally, he could have for his barn, a metal-clad building, all aluminum on the outside with rafters and framing of lumber.

This man, pioneer of today's western Canadian home, could be more than proud of his boast. But he might add regretfully that he had been born a half-century too soon. (This is the second article in a series of five on the services of the retail lumber merchant to western Canadian communities.)

Early Settlers Would Be Astonished At The Diversified Business Run By Local Lumber Merchants

A new Canadian settler of 1880 set forth in his journal a description of the average prairie home of that time as a "dwelling of logs; hewn smooth on both sides, then well plastered between the logs." "Under the floor of each house," he wrote, "is a cellar for storage of root crops for winter use."

He and his family were given temporary shelter in the upper part of a friend's shanty. This "upper part" was in reality a lumber loft.

He and his sons drew logs for their own home and learned the rest of their lumber by ox-drawn cart across country twenty miles to and from the nearest navigable river where it was unloaded by steamer. There was no sawmill in the area.

MOOSE POPULATION IN SASK. INCREASING

REGINA.—The moose population of Saskatchewan, which reached an all-time low six years ago, now is again on the upswing. Provincial game supervisor Harold Reid reported the conservation program initiated by the government "is slowly but surely bringing them back."

SPEAKER'S SYMBOL

VICTORIA, B.C.—A beautifully carved Indian "talking-stick" has been presented to Lieutenant-Governor Clarence Wallace by Chief William Skow. The custom is to place the stick in the ground in front of the chief when he wants to address the tribe.

LANGFORD, B.C.—A Langford cabinet maker intends to devote his spare time in the next 12 years to carving on wood the history of a Canadian era.

Copenhagen-born Kaj Nelson came to Canada 25 years ago and brought with him the desire to study the history of his new home. He finally decided that the Hudson's Bay company and its explorers provided "the most colorful history in Canada."

Several years later he chose to put these stories on wood.

He completed the first 30 carvings after three months of work. It shows a scene of a battle in Hudson Bay in 1697 between three British ships and a French vessel.

Nelson said that it would take him about 12 years to complete all the 36 carvings.

News Items From Kinsella & District

Visitors to Kinsella during the Easter holidays included Dr. Eastwood and children, Mr. and Mrs. C. Smogard, Mr. and Mrs. J. O. Smith and family, Mr. J. O. Smith, Mr. and Mrs. H. Boyd and son, Misses N. and T. Beres, Mr. E. Powell and children, Mr. and Mrs. L. Wheatley and family, Miss Jennie Beres, Miss Shirley Davis, all of Edmonton, Mr. and Mrs. M. Walker and Garry of Calgary, Mr. and Mrs. S. L. Loney and children of Albx.

The Misses H. and K. Northwick left Edmonton by plane on Friday to spend a short holiday with relatives at the coast.

A successful Easter Tea, sale of work and home cooking, sponsored by the Ladies Aid was held on Saturday afternoon. The members of the Ladies Aid wish to thank all those who gave assistance in any way.

Congratulations to Mr. and Mrs. W. Hughes (nee Edith Long) who

were married in Edmonton recently.

Mr. and Mrs. R. Cormack and Mrs. A. Loades were visitors to Edmonton last week.

Two of our teachers, Miss A. Polutranko and Mr. L. West spent the Easter week holidays at their respective homes at Vegreville and Toilead.

Mr. E. Miller is visiting relatives at Hay Lakes.

Special Easter services were held in the Kinsella Church on Sunday. The senior girls of the Sunday School sang appropriate hymns. The church was decorated with plants and cut flowers. Four children were christened: Doderick John and Blaine David, sons of Mr. and Mrs. Dave Greenwood. Brian Douglas, son of Mr. and Mrs. A. Barker and Sharon Evelyn, daughter of Mr. and Mrs. C. Testman.

The show to be shown here on Friday, April 18 is "Kidnaped."

EXPECT OUTBREAK OF CATERPILLARS

Unless there is a late frost, nothing can prevent an outbreak of tent caterpillars which would strip foliage from a number of Alberta forest areas this summer, G. R. Hopping of the Calgary Forest Insects Lab, Federal Dept. of Agriculture, said over the week-end.

The devouring hordes of cater-

pillars are expected to range over forest areas between Rocky Mountain House and Lesser Slave Lake. Outbreaks appear to be cyclic, occurring at about 10-year intervals.

Forests around Banff and Lake Louise are expected to escape the scourge as the effects are felt mostly in the foothills. In former outbreaks, trains have been delayed because the crushed bodies of the insects make the rails too slippery for traction.

Land Sales Aplenty In MD of Wainwright

The Council of the MD of Wainwright No. 61 met in the Council Room of the MD on Thursday, the 3rd day of April, 1952, as provided for in section 145 of the MD's Act being Chapter 151 of the Revised Statutes of Alberta.

Chas. Wilbraham, R.O., called the meeting to order at 10 a.m. and declared the results of the election held March 18, 1952.

That Victor Dalyn had been elected by acclamation for Division One for three years.

That William Castle had been elected by acclamation for Division Two for three years.

That Almon C. Archibald had been elected by ballot for Division Seven for three years, and that the said Councilors were in attendance at this meeting and had signed the Oath of Office and are qualified to sit as Councilors.

The following Councilors were present:

Messrs. Dalyn, Castle, Sutherland, Belanger, Smaile, Arthur and Archibald.

This is the official record of the proceedings.

The R.O. declared the meeting open for nominations for the office of Reeve for 1952-1953 year.

Clr. Smaile nominated Clr. Sutherland.

Archibald—that nominations close.

The R.O. declared Clr. Sutherland elected Reeve by acclamation until April 3, 1953, or until a successor is appointed.

The Reeve called for nominations for the office of Deputy Reeve for the first six months.

Clr. Archibald nominated Clr. Smaile. Clr. Smaile nominated Clr. Archibald.

A Ballot being taken and the results transmitted to the Chair.

The Reeve declared Clr. Smaile elected as Deputy Reeve for the first six months.

Arthur—that the Minutes of March 13, 1952, be accepted as written.

Administration and Taxation.

Archibald—that the 1952 signing Officials of the District be Dave Sutherland, Reeve, or P. T. Smaile, Deputy Reeve, with Chas. Wilbraham, Secretary-Treasurer.

Clr. Smaile—that Winspear, Hamilton, Anderson and Co., Chartered Accountants, Edmonton, be appointed Auditors for 1952.

Archibald—that Chas. Wilbraham be appointed Assessor for 1952 and that the Reeve notify

the Minister of Municipal Affairs as to the appointment.

Castle—that Doctors J. D. Wallace and A. R. M. Oakley be appointed Municipal Health Officers for the MD at a retaining fee of \$50.00 each per annum and 25¢ per mile for total mileage.

Committees for 1952:

The Reeve to be "Ex Officio" on all Committees.

Arthur—that Clrs. Smaile and Belanger be the Finance Committee.

Archibald—that the Council be a whole be the Public Works Committee.

Smaile—that the Council as a whole be the Committee for Health, Public Welfare and Municipal Property.

Arthur—that each Councilor be a Committee re: Pound Damage with power to call in any other Councilor.

Arthur—that Clrs. Smaile and Sutherland be the Committee for Appraisals under the Tax Recovery Act.

Castle—that Clrs. Archibald and Smaile, and Messrs. J. A. Bell and Don Polkins with J. S. Robblee, District Agriculturist, shall constitute the Wainwright Agricultural Service Board for 1952.

Sutherland—that the Council meet on the second Thursday in each month in the Council Room at Wainwright, Alberta, at 9 a.m.

Archibald—that any Councilor be privileged to represent the MD at any Divisional School or Municipal Hospital meeting.

Finance.

Castle—that the accounts as recommended by the Finance Committee and subsequent accounts presented be passed for payment.

Sutherland—that the Statement of Receipts and Expenditure for the month ending March 31, 1952 be accepted and incorporated in the Minutes.

Administration and Taxation (2)

Sutherland—that the cancellations be approved.

As per Motion No. 74 of March 13, 1952, Minutes of Council.

Bylaw No. 366 being a Bylaw of the MD of Wainwright No. 61 authorizing the Assessor to Assess for Taxation purposes all personal property found within the bounds of the MD of Wainwright No. 61 as presented to Council.

Arthur—that Bylaw No. 366 pass its first reading: Clr. Arthur, Smaile, Castle, for the first reading.

Clr. Dalyn, Sutherland, Belanger,

Archibald, against the first reading.

Small—that the Secretary write the Wainwright School Division No. 32 to inquire of the result of the joint meeting of School Trustees, Town Council, Chamber of Commerce and the MD Council re: representatives held at the Wainwright School on the evening of February 28, 1952.

Archibald—that the reply from the Member of Battle River Const. House of Commons, Ottawa, dated March 28, 1952, reference to the enlargement of the Wainwright Military Camp be read and accepted and filed.

Bylaw No. 367.

A bylaw of the MD of Wainwright No. 61 to repeal Bylaw No. 304, April 3, 1951, passed first, second and third reading.

Bylaw No. 368.

A bylaw of the MD of Wainwright No. 61 authorizing a discount of 2½ per cent on all payment made prior to the first day of November, in each and every year on all bills which become due and payable in the year in which the payment is made, passed first, second and third reading.

Bylaw No. 369.

A bylaw of the MD of Wainwright No. 61 authorizing the expenditure of certain sums of money by the way of Charitable Grants for 1952, passed first, second and third reading.

Secretary note: Salvation Army \$100.00; Canadian Red Cross \$125.00; CNIB \$50.00; Woods Christian Home \$50.00; Beulah Home \$50.00.

Bylaw No. 370.

A bylaw of the MD of Wainwright No. 61 for the purpose of authorizing the purchase and payment of a Caterpillar Tractor, Scraper and Dozer, passed first, second and third reading.

Dalyn—that the report of the Secretary re: Marion Young be accepted and that the Royal Alex. hospital be paid the sum of \$300 being the total amount as provided for in Section 6 of the Hospitals Act.

Bylaw No. 372.

A bylaw of the MD of Wainwright No. 61 authorizing the signing of a contract with the Medical Practitioner for the care of residents in Township 43, Range 9, West of the 4th Meridian lying north and west of Battle River presented. Passed first, second and third reading.

Municipal Property.

Smaile—that the applications of Jasper Peterson to purchase Lots 31-32, Block 28, Plan 1155AE, Wainwright, be refused.

Application of Pearl Parritt to purchase Lot 21, Block 10, Plan 1155AE, Wainwright's Central Park, be held for investigation.

Bylaw No. 373.

Concerning the sale of Lots 39 and 40, Block 10, Plan 1155AE, Wainwright's Central Park to Clarence N. Eliason of Wainwright, Alberta for \$25.00 cash, passed first, second and third reading.

Bylaw No. 374.

Concerning the sale of Lots 1-2-3, Block 28, Plan 1155AE, Wainwright's Central Park to Blanche C. Reinhart of Wainwright, Alta. for \$35.00 cash presented, passed first, second and third reading.

Bylaw No. 375.

Concerning the sale of Lots 35-36-37-38, Block 10, Plan 1155AE, Wainwright's Central Park to John F. Weber of Wainwright, Alta. for \$40.00 cash presented, passed first, second and third reading.

Bylaw No. 376.

Concerning the sale of Lots 30-31-32, Block 28 Plan 1155AE, Wainwright's Central Park, to Samuel O. Johnson of Chauvin, Alta. for \$30.00 cash presented, passed first, second and third reading.

Bylaw No. 377.

Concerning the sale of Lots 37-38-39-40, Block 9, Plan 1155AE, Wainwright's Central Park, to Charles E. Callas of Wainwright, Alberta, for \$45.00 cash presented, passed first, second and third reading.

Bylaw No. 378.

Concerning the sale of Lots 33-34, Block 27, Plan 1155AE, Wainwright's Central Park to Floyd G. Lemley of Wainwright, Alta. for \$30.00 cash presented, passed first, second and third reading.

Bylaw No. 379.

Concerning the sale of Lots 25-26-27, Block 28, Plan 1155AE, Wainwright's Central Park to Russell Baker of Chauvin, Alberta, for \$35.00 cash presented, passed first, second and third reading.

Bylaw No. 380.

Concerning the sale of part of the SE 30-45-6-4 containing two acres more or less in L/S, Title 29-2-119 to Austin A. Kingston of Wainwright, Alberta, for \$38.00 cash presented, passed first, second and third reading.

Bylaw No. 381.

Concerning the sale of the NW 4-44-9-4 to Frank Baska of Irma, Alberta, for \$400.00 cash, presented, passed first, second and third reading.

Bylaw No. 382.

Concerning the leasing of certain lands, Section 217, MD's Act presented, passed first, second and third reading.

Agricultural Service Board.

Smaile—that this Council approve the Services Board's estimated Revenue and Expenditures as passed at the Board meeting on Messrs. W. C. Taylor and M. Daniels interviewed the Council reference to a proposed Seed Cleaning Plant to be erected at Wainwright, after considerable debate.

Arthur—that this Council do agree in principle the matter of an erection of a seed cleaning plant within the bounds of the MD of Wainwright No. 61.

Public Works.

A delegation from Division 2 interviewed the Council reference to the condition of the roadway and the bridge over the Ribstone Creek in the NW 35-43-4-4 requesting that the road be built on the road allowance north of Section 35-43-4-4 and that the bridge over the Ribstone Creek be moved to the new location, after debate, the Secretary was asked to prepare a petition addressed to the Minister of Highways, such petition be sent to Clr. Castle for completion.

Arthur—that all Divisions showing an over-expenditure of Public Works as at December 31, 1951, be given a period of two years to balance their over-expenditures by reducing same at least by 50 per cent each year.

Castle—that in the matter of the purchase of the Dome Elevator attachment that same be purchased on the approved rental basis to commence at the date of mounting and that the representatives of the Union Tractor Co. interview the Council at their next or adjourned meeting.

Smaile—that an advertisement be placed in the Education Journal for three experienced Motor Grader Operators and two experienced Caterpillar Operators and that all applications and considerations be dealt with at the next meeting.

Arthur—that the letter from R. H. Robinson re: Survey in NE 31-44-3-4 be received and referred to Clr. Belanger.

Dalyn—that as the survey through S24-8-42-2-4 has been reviewed and approved, the same be paid \$175.00 for the 7.98 acres taken for said roadway.

Arthur—that the Shop Foreman be authorized to have one Bank House built and to use his own discretion as to what chassis to mount same and that he also be authorized to purchase one 500-gal. capacity Oil Tank to be mounted, also.

Sutherland—that the pay sheets be passed and paid when signed by the councillor concerned.

Smaile—adjourn. To reconvene at the call of the Reeve.

For Your own sake give to conquer cancer!

There's one chance in five that you will have cancer. A fifty-fifty chance that someone you love will need help in fighting cancer.

Your dime, your dollar, whatever you give helps change these odds in your favor... helps pay for more research on the cause and cure of cancer. And your contribution helps us furnish hospitals, doctors and equipment when they're needed.

Protect yourself and your family.

GUARDIANS OF PEACE

*The Infantry Recruit...
Keyman in Canada's Future Security*

Growing in size and strength the Canadian Army Active Force needs more Infantry Soldiers.

The Infantry recruit is a keyman in our defence plans. For as he finishes his training he will take his place in the front lines of our freedom at home and overseas.

But it takes time to produce these highly trained soldiers. And to maintain our security, to discourage aggression, we must be able to meet any eventuality. That is why we must have more young men for Infantry training now.

If you are interested in Canada's future, now is the time to do something about it. Serve with the most important men in the Army—the Infantry.

There are outstanding career opportunities for young men in the Canadian Army Active Force.

You are eligible if you are 17 to 40, tradesmen to 45, and ready to serve anywhere.

Get full details from the Army Recruiting Office nearest your home:

No. 10 Personnel Depot, Currie Barracks, Calgary, Alta.

The Army Information Centre, 10040 101st Street, Edmonton, Alta.

Modernizing Buckingham Palace For Queen Elizabeth

LONDON.—There'll be some changes made when the Queen moves into Buckingham Palace, the vast 611-room castle which still bears the stamp of her 84-year-old grandmother. During the long years that Dowager Queen Mary, mother of the late king, lived there, Buckingham Palace remained a sombre place of gilded magnificence, dark crimson draperies and heavy Victorian furniture. The atmosphere survived after she moved out following the death of King George V in 1936.

Now that Queen Elizabeth, 35, and her handsome 30-year-old husband are getting ready to move soon from their modern apartments at Clarence House, the old castle is in for modernization.

An oil heating system is being installed in what is generally known as the "coldest house in Europe" and 16,000 is being spent to bring the electrical system up to date.

The royal family actually will occupy only a minor part of the building—only their own suites and nurseries for little Prince Charles and Princess Anne. But the presence of youth is expected to brighten the whole court.

The Queen's taste in interior deco-

changes made when the Queen moves into Buckingham Palace, the vast 611-room castle which still bears the stamp of her 84-year-old grandmother. During the long years that Dowager Queen Mary, mother of the late king, lived there, Buckingham Palace remained a sombre place of gilded magnificence, dark crimson draperies and heavy Victorian furniture. The atmosphere survived after she moved out following the death of King George V in 1936.

At present the Queen is busy arranging details. Besides deciding what room she will need and what decorating she wants done, she also has to pick the staff she wants to take with her—more than 200 servants are needed to keep up the palace.

When Elizabeth and Philip move from Clarence House they will change places with the Queen Mother and Princess Margaret.

Actually, once she is set up in Buckingham Palace, Queen Elizabeth may no longer be mistress of her own home. Not only will she be tied up for up to 12 hours a day with state affairs. But the palace is so large that those who live and work there often do not know what is going on under its roof.

The story goes that when Queen Mary first moved into the palace she got lost. Two hours later search parties were sent out to find her.

Vitamin E May Save Lives Of Many Animals

CHICAGO.—Development of a highly potent vitamin E concentrate may save the lives of thousands of lambs and calves this spring, the American Veterinary Medical Association said.

Workers at Michigan State College have learned that the concentrate, known as Alpha Tocopherol, can prevent in animals a condition known as "white muscle" disease.

The disease, believed due to a shortage of vitamin E, can cause calves and lambs to die of heart trouble. Symptoms in lambs include slow movement, leg stiffness, arched back, pneumonia and difficulty in breathing. Calves may develop a founderlike stiffness, show respiratory symptoms or stand with tongue protruding, fighting for breath.

Advertising Cost Rise Held Small

HAMILTON.—The cost of newspaper advertising, compared with an increase of more than 100 per cent. in newspaper production in the last 10 years, has been small, A. G. Muir, general manager of The Hamilton Spectator, told the Hamilton Real Estate Board recently.

He pointed out that newspaper circulation over the same period had increased tremendously, giving wider coverage. Mr. Muir advised real estate advertisers to use more explanatory copy to display the qualities of what is being offered for sale, so that the reader can get a better idea of what is available for purchase.

FLYING RADAR PROTECTS ALASKAN BOUNDARIES—A formation of U.S. all-weather fighter-interceptors is shown crossing the Cook Inlet near Anchorage, Alaska, on a training flight. These fast jets of the Alaskan air command provide air defence of Alaskan bases around the clock in any kind of weather. In the nose of each plane are radar "eyes" that can find an enemy through snow, rain or fog and aim the guns for the pilot.—Central Press Canadian.

Evergreens From Seed

It is a long time—about six years—from the time evergreens are sown as seed until they are ready to be planted in their permanent location or are ready for marketing. A. W. Crookshanks of the Forest Nursery Station at Indian Head, Sask., describes the sequence and points out that great care is needed in preparing the seed and in caring for the young plants throughout the whole period.

The seedbed area should be manured and well worked the summer previous to seeding. After the seedbeds are constructed, usually 4 feet wide and any desired length from 12 feet up, the soil in them should be leveled ready for the seed. A heavy soil requires the application of screened sand and fine peat moss to prevent baking and a sandy soil requires peat moss or leaf mold to increase its moisture holding capacity. These materials should be worked into the top soil just before seeding.

The seed may be sown broadcast or with a small garden drill, raked lightly with a garden rake and then rolled. It is customary to treat the seed with an excess of a fungicide, such as Arsan, just prior to seeding, to prevent damping-off. The seedbeds must be kept moist to insure good germination, and protected from the sun and wind by screens made of lath, spaced to give half shade. These screens should remain on the beds for the first part of the second summer, and then removed.

Care must be taken during the first two summers to provide good aeration and treatment with a suitable fungicide, to prevent damping-off, which is the chief cause of mortality among evergreen seedlings. A top dressing of peat moss and screened sand during the second and third summers will prevent baking in heavy soil.

After two or three years in the seedbeds the young plants should be transplanted into rows, 12 to 14 inches apart, and spaced about 4 inches apart in the row. The best time to do this is in the early spring when soil moisture is high. Trans-

For Long Life, Men, Get Married

LONDON.—For long life, men—get married. "Bachelors do not live as long as married men, are more prone to gastric ulcers and fail to stand up as well to a financial crisis," said a 35-year-old bachelor, Dr. Philip Tynan, writing in the trade paper, Family Doctor.

Gastric trouble is known to the medical profession as the bachelor's bane—or frying-pan ulcers, said Tynan.

Light heartedly probing the reasons why men want to stay single, Tynan gives a few examples:

"The man in a rut who does not know he is in one, and thinks if he marries he will be."

"The man who never gets anyone quite good enough, and the one who is never quite good enough for anyone."

"Bachelors are not women-haters," the doctor writes. "Many enjoy feminine company so much they don't want to spoil their appreciation by marrying any of them."

"And the doctor? 'I am a bachelor only by chance,' he said. 'I've been engaged twice.'"

RECEIVES ANNUITY FOR 46 YEARS FROM INSURANCE COMPANY

NEW YORK.—In a day-time observance of her 102nd birthday, Mrs. Thomas R. Almond was presented with a regular payment on the annuity contracts she has had with a life insurance company for 46 years.

Lewis M. Dawson, president of the company, called in person to present the cheque. Mrs. Almond in her apartment at the Park Chambers Hotel, where she observed her 102nd birthday. He reminded her that since she purchased the annuities in 1906, the company has paid her more than triple the amount received from her.

"Oh, my goodness," she exclaimed. "I feel as if I'd defrauded you."

New Zealand Spray Fertilizers From Air On Farm Lands

AUCKLAND, N.Z.—Veteran New Zealand pilots of the last war are finding a livelihood with thrills in an unlikely direction—spraying fertilizer from the air on vast farming areas.

The almon work over farms in steep hill country that's too broken and rugged to be covered economically by traditional ground methods. From improvised landing fields they pilot their small planes along steep hillsides and ridges, often turning at the heads of gullies with few feet to spare, flying back with a long white cloud of fertilizer trailing down behind them.

In this way they cover in a few hours country that would take weeks of backbreaking work to fertilize by hand methods. Trucks and tractors cannot reach much of this land and for years it has remained poor in quality and able to support few animals. Now with the introduction of the aeroplane, however, much of it is being converted into first-class grazing country.

Aerial topdressing is one of the country's fastest growing industries, for once it has been demonstrated for rapid expansion of New Zealand's farm production. Already barren hillsides are showing a thick sward of pasture and supporting herds and flocks.

But it is dangerous work. The pilot hardly ever has a recognized airfield to operate from. Usually the best they can hope for is a rough farm field cleared of major obstructions.

They must fly low to ensure an even spread of fertilizer, and are constantly skimming the tops of hillsides and ridges. Getting off the ground with a full load of chemicals is a task in itself.

But there is no lack of applicants for the job. Fliers with distinguished battle records may find everyday life dull, and aerial topdressing has become the glamor job of post-war New Zealand.

Crashes are frequent and the wear and tear on the planes is considerable, but pay is high and the job is a challenge to the skill of the pilots. In most cases the fliers manage to come out of ugly situations unhurt or with only minor injuries. The job takes its toll all the same.

Regulations are being drawn up to protect the public, and the incidence of accidents, but the occupation from its very nature will remain dangerous.

World's Billiard Champion Plans To Retire In Fall

SAN FRANCISCO.—Willie Hoppe, 48 times a world billiard champion in 47 years, plans to retire next fall, perhaps on his 50th birthday.

"That's OK," he said. "I've been considering this step a long time," he said. "I don't want to wind up seventh or eighth, and have everyone feeling sorry for a beaten old man."

Hoppe won his first championship, at 351 ballkine billiards, in 1906. Teddy Roosevelt was president then; Tommy Burns was heavyweight boxing champ and Honus Wagner led National League ballers. Willie went to Paris and defeated the great Frenchman, Maurice Vignaux.

He won the title he now plans to be his last—the three-cushion crown—recently, defeating the Japanese star, Kinney Matsuyama, 50-37 in 60 gruelling innings. It's his 12th year on the three-cushion throne.

To win that one, he survived two heart-breaking defeats; an obvious case of nerve strain; the wear and tear of 47 years of tournaments, challenge matches and exhibition tours; a head cold and the tension of a title match before a standing room only crowd in a hot, smoke-filled room.

Hoppe not only has won—he's monopolized every recognized billiard championship, plus three specials tossed in for diversion.

He held the 18.2 ballkine title 14 years: in 1907; 1910-20 inclusive; 1923 and 1924. He owned the 18.1 ballkine crown 19 years: in 1904-07; 1909-11; 1914-27. Ballkine competitions were discontinued 18 and 25 years ago, because Hoppe, Jake Schaefer and Welke Cochran became so proficient fans got tired watching them make long runs.

The three then turned to the spectacular three-cushion game. Schaefer never won that title. Cochran won it six times and retired. Hoppe has had it 12 years: in 1935, 1940-44 and 1947-52.

He also won a special 14.1 ballkine crown in 1914 and a 71-2 ballkine title in 1938—only time either event was held. And he picked up a cushion crown title in 1933.

The banana plant is not a tree but a huge herbaceous plant which grows as high as 30 feet.

Dairying In The Klondike Valley, Y.T.

Dawson City and the Klondike River! Bonanza, Eldorado, Gold Bottom and Hunker Creek! These names call to mind the turn of the century, visions of fabulous discoveries of free gold, of dance hall crowds and riotous living; but today the Klondike is ice and snow, and the sordid ballads of Robert W. Service and Jack London. All of course are more or less legendary.

For, on the other hand, they visualize a pastoral scene, a river valley, fields of brome grass pasture, and a grade herd of dairy cattle grazing thereon, and this, bear in mind, just beyond N. Lat. 64 degrees and approaching the Arctic Circle, says J. W. Abbott, officer in charge of the Experimental Farms Service, most northerly Substations at Whitehorse, Y.T.

For many years, nonetheless, a sordid venture of '98, Mr. A. Fournier, maintained a dairy establishment within sight of most of these legendary creeks. The dairy of the Klondike River provided pasture and forage, and the settlement of Dawson City, eleven miles distant, represented a steady market for his dairy products, principally fresh milk.

As a rule his dairy herd averaged twenty-five to thirty head of grade animals. The operator strove for a milk cow of mixed blood, a Holstein-Shorthorn cross, and the animals of his herd in recent years were of a uniform and commendable type. When an animal's productivity ebbed a steady market for fresh meat in Dawson awaited her conversion.

Winter feed consisted mainly of brome grass hay. Some years a small acreage of oats was sown and cut green to supplement the straight diet of brome. Other years Mr. Fournier purchased millfeed. In Vancouver, B.C., which came by coastal steamer to Skagway, Alaska, then by White Pass and Yukon railway to Whitehorse, Y.T., and finally by British Yukon Navigation Company from Whitehorse to Dawson City. The cost of this millfeed, landed at Dawson, was from two hundred to two hundred and fifty dollars per ton. It was fed during the late winter milk flow, and at the same time to build up the producing members of the herd.

The establishment carried also a number of Yorkshire hogs, and a small flock of poultry. Excess, and waste produce from the barn, found waiting consumers in these farm enterprises.

The operator delivered his milk, bottled, in Dawson City on alternate days of the week. The price delivered was 25 cents per quart. Meat, was delivered during the cold months, quartered and sold at 55 cents a pound. On native forage alone the meat, critically first class, frequently carried excess pounds of fat.

Of recent years Mr. Fournier has met increasing difficulty in securing manual help. Explaining the problem he points out that in a territory where mine's wages prevail, an agricultural employer must meet the established rates, or accept inefficient or rejected help. Even this help, when available, responds only to an eight hour day, and a five and a half day week. The dairy industry can scarcely conform.

The record concludes in liquidation. During the past year this sordid dairymen, due mainly to failing health and advancing years, has been selling off his animals and property. Most of the animals go to the local meat market, the property to a neighbour. This neighbour, younger in years, will probably maintain the frontier record, with one variation: best cattle will likely replace the milk herd. Circumstances indicate a profitable venture.

This classic suit, (left) shows the fine details typical of the new spring suits—small rolled collar, turn-back cuffs, petit pockets on the new shorter jacket. The trim skirt has four gores. Wavy printed taffeta, (right) wherein the threads are color printed before they are woven, is very new for spring. Here it is in a gracious evening gown, suitable for spring and summer formal occasions.—Central Press Canadian.

British Astronomer Preparing Book For Trips To Moon

LONDON.—A British astronomer is compiling a "guide book to the moon" because he thinks man will be making trips there in the 1960's. Patrick Moore, of the Royal Astronomical Society, thinks the first travellers to the satellite ought to be no less well-informed than, say, Americans now arriving in Britain.

"People often have asked me why I spend hours gazing at the moon through a telescope," he said. "They want to know what's the use. Well, it is only common sense to find out as much as we can about a place where we are going."

"If I want to visit a foreign country I do not merely pack a suitcase and jump on board the first airplane. If I have never been there before and know nothing about it, I buy a traveller's guide. What we are trying to do at the moment is to form a traveller's guide book to the moon."

Expert Looks To Sun For Heat Of Future

Talking of electric heating, L. N. Robertson of Seattle says he "haven't seen anything yet."

Head of a firm which sells both electric and oil units, Mr. Robertson claims that electric heating is actually cheaper on monthly fuel bills than oil.

"In each case," he says, "the oil bills for the three oil-heated houses were higher last year than the electric heating bills for the other three."

He claims Seattle electric heating costs are roughly comparable to B.C.E.R. rates in Vancouver. But in Seattle today, he says, you wouldn't be allowed to put electric heat in your home. There's a power shortage and the company has prohibited use of power for new home heating.

"Even so, there are 10,000 homes in Seattle heated electrically," he says. "Schools and apartments are using it, and in other sections of the U.S. electric heating is growing at a fabulous rate."

"In Nashville, Ten., 85 per cent. of the homes now under construction are employing electric heat."

Mr. Robertson looks to solar heat to help cut down fuel bills in new construction in the Pacific Northwest. He cites a school on the west coast that cut heating costs 22 per cent. by using sun-catching skylights.

Atomic heating, he says, doesn't look promising. At the present rate of utilization the world's known reserve supply of uranium will last only 30 years.

Moore is one of a small group of astronomers who spend all the time they can observing the moon. He and other members of the British Inter-planetary Society were excited recently when American experimenters disclosed they had fired rockets carrying monkeys 80 miles into the atmosphere.

As an acknowledged authority on lunar matters, Moore thinks the fabulous journey to the moon of fiction ought to become reality sometime in the 1960's.

As the guide book now shapes up, the moon doesn't compete as a holiday area with the Riviera, Miami or Rio de Janeiro, or even, for that matter, Moscow.

But for general information, the moon traveller must know that the satellite is 2,158 miles in diameter and would just about fit into the Atlantic Ocean.

It has little or no atmosphere—so bring your own oxygen. Its gravitational pull is only one-third that of the earth, so you can progress in literal leaps and bounds.

The temperature varies from 100 degrees below zero to 100 above, which ought to please all tastes. There is no vegetable or living matter, as far as is known, although some primitive vegetation is suspected.

"The moon rotates on its axis in the same time that it takes to rotate around the earth. Thus only one side of it ever has been seen. But the part that is visible has been well mapped by Moore."

Moore has listed the names and height of the mountain ranges, the area of its great craters and vast dry plains, and has picked out the places where scientists of the past have at various times discerned unusual occurrences—such as the dark patches near the Crater of Eratosthenes which someone once suggested might be a swarm of insects.

The guide book, when finished, will be the most thorough description of the moon in existence. But that un- seen other side baffles Moore. He likes to quote a poem about it:

"Oh moon, lovely moon with that beautiful face
"Careening throughout the boundaries of space,
"Whenever I see you, I think in my mind—
"Shall I ever, O' ever, behold you behind?"

FRICKLE-FACED RAYMOND FRANCOEUR, a 14-year-old runaway, knows how to travel cheap: he came to Montreal all the way from Manchester, N.H., on 25 cents. Not only did he travel the more than 200 miles on two bits, but he'll go home with a souvenir from the city, a pair of policemen's boots and gloves. Raymond is shown in the above photo on his way to police headquarters following his "capture" in a box car.

War Book Praises Canadian Troops On D-Day In 1944

(By Alan Harvey, CP Staff Writer)

LONDON.—Canadian troops made faster progress on D-day in June, 1944, than any other allied invasion force, says a book on the Second World War by Australian author Chester Wilnot.

Wilnot, a former BBC correspondent, writes in his "the struggle for Europe" that the Canadians overcame formidable difficulties, including in some cases treacherous reefs off shore, choppy seas, non-arrival of armor and tremendous congestion on the beaches.

"In the circumstances," he writes, "it was remarkable that the Canadians made as much progress as they did: more progress, in fact, than any other division on D-day."

Wilnot's 766-page book, due for publication shortly in Canada and the United States, is sprinkled with several other references to Canadian engagements. The author tells how the Germans drove the Royal Winnipeg Rifles out of Eutot after a day-long battle and how Kurt Meyer, commanding an S.S. division, rode on the back of a panther tank in leading an attack on Canadian positions in Breteville.

"The Regina Rifles were overrun but they held their ground and maintained such steady fire that no German infantry could get through to support the armor," recalls Wilnot. Then the 1st Canadian Scottish made a brilliant counter-attack and retook Putot.

Wilnot devotes several pages to the Canadian army's major offensive in Normandy, noting in particular the part played by Meyer in checking an early Canadian plan to break through to Falaise. Meyer was imprisoned in Canada for war crimes after the war and recently was in-

terviewed in Germany by a Canadian Press reporter, Douglas How.

Of Lt.-Gen. Guy Simonds, then II Canadian Corps commander, now chief of the Canadian General Staff, Wilnot says:

"... A most able, forceful and original soldier. Ambitious, reserved and ruthless, Simonds was not an easy man to serve, for he was intolerant of minds less capable than his own, but he certainly commanded confidence and respect."

Earlier, in a reference to the Canadian assault on the French coastal town of Dieppe in August, 1942, Wilnot says the sacrifice of the 3,369 casualties was not in vain. They proved that no fortified channel port could be taken by direct assault with the resources then available and provided experience "which was to save hundreds of allied lives within the next two years."

UNWRAPPED DOLLAR BILL TRAVELED SAFELY FROM ONE STATE TO ANOTHER

HOPKINSVILLE, Ky. — An unwrapped dollar bill travelled on a package from Georgia and Kentucky, giving one Kentuckian new evidence that there are plenty of honest people in the world.

Cecil H. Lee, Hopkinsville rural route 5, said he received a package from his mother, Mrs. Mary E. Lee of Leesburg, Ga.

Underneath a cord tying the package was a dollar bill. Post office employees saw the dollar but left it as was.

Lee said he supposed his mother had stuck the bill under the string, intending to pay the postage from it, and that someone else paid the postage and left the bill there.

Vancouver Man Without Stomach Can Only Eat Egg Flips

VANCOUVER.—It's fortunate indeed that William Douglas "Bill" Haining likes egg flips.

It would be awkward if he didn't like egg flips because they are about all he can eat.

Haining has no stomach. It was removed recently in the operating room of a Montreal hospital.

The 47-year-old Vancouver master mariner was commanding a tanker in the Far East 10 years ago when he was captured in Borneo by the Japanese. Three years of malnutrition, hard food and hard labor in Japanese camps wrecked Haining's stomach.

Haining is now home trying to put on weight to undergo a further operation.

Egg flips are the answer.

Every two hours he quaffs an egg flip, a concoction of egg and juniper juice given to him by his doctor.

These egg flips, Haining says, offer a welcome supplement from the unimpaired other liquids and intramuscular and intra-venous injections to give him nourishment.

"Sometimes I get thinking about a steak," Capt. Haining muses wistfully. "But then I think of what you poor souls with stomachs have to pay for a steak and I'm not in such a bad spot after all."

"I really like egg flips."

Wears Only Bathing Trunks In Winter

SASKATOON.—Middle-aged Dick Rustemeyer, wearing only bathing trunks as he putters around his back yard with odd jobs, smiles as he watches shivering, fur-coated neighborhood women hanging out shirts and other laundry in sub-zero weather.

It's the shirts and socks that amuse him. There are no shirts or socks on the Rustemeyer clothesline.

Rustemeyer, hasn't worn a shirt for about 15 years. While he is no nudist, he lives more or less the life of a nudist, even in 40-below weather.

It started with the practice of gardening and working outdoors without wearing a shirt. He kept up the habit as far into the winter as he could. Eventually, Rustemeyer became allergic to the weight and feel of clothes.

On his feet, even in winter, he wears a pair of canvas shoes with the uppers cut away to form sandals. But when he goes downtown he wears an unbuttoned pair of canvas shoes, slacks and an unbuttoned jacket.

His chest is rusty with summer tan and winter windburn, but hard. He says he's had one cold in 15 years. And mosquitoes never bother him. His skin is too tough.

Now retired, Rustemeyer takes on light duties on his own time schedule. He's up at 3:30 a.m. every morning and goes to bed at 8 p.m.

A native son of the Ruhr, he came to Saskatchewan in 1912. His English wife, who doesn't have to worry about ironing any shirts, says he's a "wonderful" husband.

Canada's Eskimos Hard To Find

OTTAWA.—The Department of National Health and Welfare has a hard time giving money away to Canada's Eskimos because they are hard to find.

The Eskimos are nomadic and scattered over thousands of miles of Canada's northern coastline and the barren wastes of the department said. The result is that it is difficult to deliver family allowance cheques to them.

The department said there were 1,608 Eskimo families in Canada as of March 31, 1957, with 3,648 children.

Cheques are not issued to the Eskimos. Instead, they are issued certain specified items of food, apparel and equipment under the supervision of district registrars, usually Royal Canadian Mounted Police officers.

Powdered milk and approved baby cereals are considered semi-compulsory items so that the Eskimos will spend at least a fair share of the allowance directly on their children.

Other nutritious foods are gradually being introduced to the Eskimos.

Besides food, the purchase of children's clothing accounts for much of the family allowances credits, the department said.

Miscellaneous items, such as rifles, boats, and other hunting and fishing equipment are allowed in cases where a reasonable large credit has accumulated, thus increasing the Eskimos' capacity for self-reliance.

Scientists Study Removal Of Pain

BOSTON.—A way of making life painless is being studied here in the interests of cancer sufferers.

Deep in the centre of the brain is a spot which scientists believe is the crossroads of pain pathways, for most pains go to the brain.

At Massachusetts general hospital, scientists are experimenting with an electric needle. They plan to push it into this point in the brain, and destroy the crossroads with an electric spark.

Destroying it would apparently mean freedom from pain, a godsend for many cancer patients.

The method has been tried on monkeys, said Dr. William H. Sweet, neurosurgeon at the hospital, but he said it could kill pain easily, without changing personality.

Pain can be dropped by cutting the nerves in the front of the brain, in an operation called prefrontal lobotomy, but this often brings bad personality changes.

stomach. As a prisoner-of-war, the skipper's weight withered away from 135 pounds down to a mere 85.

When he was undergoing treatment in Australia following liberation in 1945, doctors expressed the hope that by feeding him Capt. Haining's stomach would gradually return to normal. But it didn't and recently Montreal doctors persuaded him to have the shrunken digestive organ removed.

Haining is now home trying to put on weight to undergo a further operation.

Egg flips are the answer.

Every two hours he quaffs an egg flip, a concoction of egg and juniper juice given to him by his doctor.

These egg flips, Haining says, offer a welcome supplement from the unimpaired other liquids and intramuscular and intra-venous injections to give him nourishment.

"Sometimes I get thinking about a steak," Capt. Haining muses wistfully. "But then I think of what you poor souls with stomachs have to pay for a steak and I'm not in such a bad spot after all."

"I really like egg flips."

Robin Is A Robin For All That

One recently returned southern traveller has snaked past the vigilant U.S. and Canadian immigration inspectors at the border, and is back again this year. Although he has been making an annual practice of it, authorities in both countries are usually content to let him pass by. In fact, the sooner he comes the happier they are.

If either one stopped him, there would be no incident of considerable proportions as local residents rose irately to his defence. People watch eagerly for his cheerful appearance and the gloom cast by his non-arrival would be heavier than a mid-winter fog.

Who is the privileged person who usually wanders so freely around on a false passport? Merula migratoria, he's called.

Still don't recognize him? Others know him as Turdus migratorius. What? You haven't been formally introduced? Well, then, you probably know the friendly little character by his more common name.

That is where the false pretences come in. Webster's sizeable dictionary says he really isn't a robin at all. He's a thrush, twice the size of a true robin, the bird that lives in England and most parts of Europe, who in formal society is named Erithacus rubecula. In contrast to our hardy forerunner of spring the English robin is described as a "small sylvine bird."

This probably won't disturb the happy residents who place him "each year to say that they have seen a robin and that spring is here. Our big double-sized bird isn't any thrush to them. He's a robin."

Condition Horses Early In Spring

Although the tractor is doing the work of horses on many Canadian farms, few are entirely without horses. There are still a number of farm jobs which the tractor can do more skillfully than his mechanized counterpart.

A few minutes spent in getting horses ready for the work they will do ten save hours and maybe days later on. During the winter months idle horses get soft and their feet often become broken to such an extent that lameness develops when they are put to work. The feet should be trimmed and straightened up early so that when the time comes for heavy work they will be ready for it.

Horses should be broken in to heavy work gradually after the long winter layoff. Feed should be gradually increased to put on extra flesh and tone the horse up generally.

Nothing causes sore shins so quickly as a dirty collar or poorly fitting harness, so include checking harness and collar as part of the spring horse conditioning.

New British Prices Compared With Old

LONDON.—Most of the everyday things Britons buy will cost more under the Government's new budget.

Here's how some of the old prices compare with the new, (with shillings and pence converted into Canadian cents):

Quart of milk—now 14 cents, will cost 25½ cents.

Pound of stewing beef—now 23 cents, will cost 28 cents.

Loaf of bread—weighing 1½ lb.—now 6 pence, will cost 8½ cents.

Imperial gallon of gasoline—now 50½ cents, will cost 58½ cents.

Package of cigarettes—now 85 pence, will cost 100 pence.

The average Briton earns about \$22.40 a week.

Nature Works For A Balanced Soil

Mother Nature works slowly. Some estimate it takes a century to create an inch of top soil. But just give her assistance. By the use of organic matter, the earthworms and the soil into close contact, supply water and watch the old lady go to work. What she can do for you is a little help will delight any one interested in her work. On that work the entire human family depends for its very being.

Our destiny is wrapped up in the top four to ten inches of our top soil. As it is depleted and unbalanced every human is affected. He may easily get volume of food, but the food itself is lacking in the essentials of health and flavor, in keeping quality and texture. The state that precious top soil determines whether a nation is great or small or will even continue to exist.

Mother Nature took centuries to build up the perfect balance, but man takes but a few short years to tear down this work and to also tear out the very foundations of his life. Nature will not tolerate such foolishness. She wants perfection in her trees, plants and soil. Unbalanced soil causes unbalanced growth which she abhors. She then brings in her hosts of inimical organisms to remove the deficient trees and plants. They are her destructive demolition squads. But if the soil is good and well balanced the plant life will be untouched by parasites and diseases or very highly resistant.

To keep conditions right for plant growth the old lady has many organisms. She has birds, makes, toads, frogs and skunks to stop depredations by insect life that has cultured from other plant life. In the soil she creates the beneficial bacteria, enzymes, clostridium and other organisms that build soil. Then into the picture she puts the humble earthworm. His job is to open up the soil so that air and water can get down to roots and tubers. He goes down as far as eight feet to bring up inert materials that are beyond the reach of the ordinary roots. But on the way to the surface the worm by a series of secretions enriches the materials, grinds them up to infinitesimal fineness and mixes them in proper balance. The workings of the earthworm are exceedingly efficient. It makes available for nutrition five times more nitrogen, seven times more phosphorus, eleven times more potash and three times more magnesium than any other agency. And all this in perfect bal-

ance for plant food.

Man has come to the assistance of Mother Nature in breeding an earthworm that is six times more prolific than the ordinary variety. These domesticated hybrids have also developed characteristics that make them very valuable. Records of 1,600 per cent. increases in yields have been recorded.

If you are conservation minded let us all get at the job in the common sense organic way. — Capt. C. E. Misener, R.R. 1, Wainfleet, Ont.

Chambray, Faillie Used In Versatile Ensembles

Easter Sunday suit, (left), made of acetate rayon and wool faillie, features the very new kimono sleeves. Unpressed pleats add a flaring line to the chic skirt. There's an Oriental hint in strapless dress right and sleeveless dress made of plain and plaid chambray.—Central Press Canadian.

OUR COMPLETE SHORT STORY—

The Colour of Love

"A Man Misses a Lot
When He's Just a Bit
Colour Blind."

By ANNA E. WILSON

"I'M AFRAID it's just a little off," Miss Lannie. Must be two years since tangerine red was popular. It was sold out then and didn't restock." She surveyed Lannie's dress anxiously and earned big eyes anxiously. "You know, Miss Lannie, you do look well in that blue you were at the tea. It was that new Copenhagen and it brought out the colour in your eyes. We have a lovely model—"

Lannie took the small sample Miss Mittie'd been trying to match and placed it firmly in her purse. "Thanks, Miss Mittie, but blue just won't do."

She went into the drug store which was empty of all except Mrs. Craven. Lannie climbed a high stool behind the soda counter and slipped off her shoes and slipped on the orange drink, Mrs. Craven. "Whew, it's hot!"

ASPIRIN

RELIEVES COLDS

FEEL BETTER FAST!

RID YOURSELF OF

Cigarette Addiction

TOBACCO EXTRACTOR rapidly expels nicotine from the system and thus removes the craving for tobacco in any form. For free literature and copy testimonials, write

KING DRUG

Box 375, London, Ont.

SLEEP TO-NITE

SEDICIN tablets taken according to directions is a safe way to induce sleep or quiet the nerves when tense. \$3.00 (Drug Stores only or direct from Toronto.)

Helps You Overcome

Itching Of Piles

Or Money Back
You do not have to be tortured and embarrassed by the itching, soreness and burning pain of piles any longer. Here is real help for you! Get the famous Hem-Rid, the internal pile treatment, at any drug store and use as directed. You will be amazed at how quickly your pile trouble fades away. Only \$1.50 for the big 50 tablet package. If you are not 100% pleased after using Hem-Rid for 5 days, ask for your money back. Refund guaranteed by all drug stores.

Fashions

In Half-Sizes

by Anna Adams

For shorter women — your own fashion designed just for you! No alteration worries, just cut out your size. The design is flattery itself, you'll look taller, slimmer! Softness at shoulders, scalloped neckline and the loveliest skirt with pockets in side panels!

Pattern 4698 in Half-Sizes 14½, 16½, 18½, 20½, 22½, 24½. Size 16½ takes 3½ yards 38-inch. This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions. Send thirty-five cents (30¢ in coins (stamps cannot be accepted) for this pattern. Write plainly name, Name, Address and Style Number and send orders to:

Anna Adams Pattern Dept.,
Winnipeg Newsprint Union,
60 Front Street W., Toronto.

"Did you get it, Lannie?" Mrs. Craven was soft and motherly. Lannie shook her head. "Thought I'd try Mander's in town. They might still have some in stock."

Mrs. Craven chuckled sympathetically. "They might at that, Lannie. It was tangerine you wore at the tea party, wasn't it?"

Lannie nodded, sipping her drink. "Tangerine red, Mrs. Craven, with gold."

Mrs. Craven surveyed Lannie critically. "Maybe you put too much store on matching that dress, Lannie. Now this new shade of Copenhagen—"

Lannie shook a firm head. "Thanks for the drink, Mrs. Craven, but it's got to be tangerine. If I hurry I may get the next train and Miss Lorraine can start work on it right away. It has to be ready for Friday, you know," she added breathlessly.

Mander's were sorry. Tangerine red was out. They were all stocked up with Copenhagen blue. Wouldn't the young lady—

Lannie wouldn't. It was already Wednesday afternoon when a small shop on a side street unearthed a bolt from a forgotten shelf. Lannie held the sample close. Gave a small gasp.

"It is," she breathed joyously. At the dressmaker's Miss Lorraine said she possibly couldn't get the dress finished by Friday. She looked ready to drop. Out in the street, there were real tears in Lannie's eyes as she went back to Miss Mittie's and asked to see the model in blue.

It was beautiful. It fitted. It made her eyes the colour of cornflowers and her hair a thing of dreams, Miss Mittie crowned.

Aunt Sammie'd love it too—she'd met Marty Borden at the Bailey's party. He'd said, "Hello, Lannie," and she'd looked up into a face as friendly as his voice had been. Lannie stared, then gasped. "Why, you must be Calie Bailey's brother, Calie said he'd be here tonight."

They sat at a small table and sipped an orange drink. They looked at each other, suddenly shy—each knowing what the other felt.

"It's beautiful," he'd said then, just touching her dress. "It's tangerine red," she'd confided, pleased that he'd noticed it. "A new shade."

Years—caught in Lannie's thought just before they got engaged. At first, she'd thought he must be an artist, he seemed to love colour so. "What colour would you call that?" he would say, looking at the sunset glow on her dress.

"Coral pink and over there it's salmon red and the water—the water's blue-green like ice."

Marty'd chuckled then. "I love to hear you talk about colours, Lannie. The way you use one colour to describe another—it's tangerine red or coral pink or smoky salmon." He became sober for a minute. "The jungles are full of colour, green and red and gold. I'll take you there some day, Lannie. You'll make it all seem alive and real." It was then she knew that he was an explorer.

Then days later, his arm tight about her shoulder. "Why three years is no time at all, Lannie, and this is a very important expedition right into the heart of the jungles of South America." Putting a firm hand under her chin he turned up her grave little face. "Why, Lannie, it'll be no time at all until I'm home."

Three years can seem an eternity when your heart is in a strange country full of fierce animals and poisonous snakes. Three years of lost letters, eating your heart out, thinking of all the ways in which expeditions can get lost—and then a letter arrives and news in all the papers that he was coming home! The boat would arrive at seven on Friday and he would come straight to her.

They eyed each other shyly across a small table. Marty was hard and brown. "It's pretty," he said smiling as his fingers touched her dress. It's Copenhagen blue," she said a bit sadly. "I tried to get tangerine red—like that first one—you know."

For a minute he looked incredulous, then his kind, humorous eyes smiled down at her as his brown hand covered her own. "Was that the colour it was, Lannie? You see," his voice was a bit apologetic, "a man misses a lot when he's just a bit—"

colour blind."

**B.C. Seed Flower
Seeds To London**

LONDON.—Two bags of flower seed, gift of the British Columbia Government, were presented to the London Garden Society for use in brightening London's bombed sites.

The 100 pounds of seed were presented by the B.C. Government in co-operation with the B.C. Seed Growers Association.

In the last 100 years, water from melting glaciers and ice sheets has raised sea level about 2½ inches all over the world.

An Ounce of Prevention

The luggage of Dutchmen emigrating to Canada now is being disinfected by order of the Canadian Government in a measure designed to prevent the possible spread of foot-and-mouth disease among cattle. In this photo, footwear is being treated with formalin in Rotterdam before emigrants embark for the trip to this country.

: Western Briefs :

Partners in Movie Theatre

EDMONTON.—Neil Colville, former New York Rangers hockey coach, and Jack McGill of the Providence Reds have become partners in an outdoor summer month theatre.

An Ancient Coin

WINNIPEG.—A Roman coin found by a man digging an excavation here was taken to museum authorities, who pronounced it a relic "probably from the years A.D. 38 to 60." The ancient coin has a likeness of Nero.

Good Scholars

STUTTGART, Alta.—Registrar David Sullivan of the Alberta Education Department said in an address here that Alberta has the highest percentage in Canada of students continuing their education through grade 12.

Steady Growth

RED DEER, Alta.—A study of education trends here produced an estimate that at least ten new classrooms will be needed here in the next five years.

Western Arts

CALGARY.—The Calgary Allied Arts Centre has announced plans for a summer festival of music, ballet and arts which would include Calgary's first outdoor ballet. The program will boast a year-round art centre here.

Great Advance Shown

SELKIRK, Man.—Old documents found when the community hall here was torn down showed the great advance in commercial fishing on Lake Winnipeg. In 1880 the total catch was valued at \$5,183. The 1950-51 commercial catch was valued at \$1,059,000.

New Phone System

FLIN FLON, Man.—Another milestone in the history of Manitoba's third largest centre was reached here when Mayor Cyril Stevenson retired the town's manual telephone exchange and W.A. Green, general manager of the Hudson Bay Mining and Smelting Co., pulled the first plug to energize a new dial telephone system for the residents of Flin Flon.

Highest Paid Police

VANCOUVER.—With the latest pay increase, Vancouver policemen now receive \$318 per month, said to be tops for first-class constables in Canada. Fred Dougherty, president of the Police Union, said however that instead of getting overtime pay they are given time off.

**HOW TO TREAT
CURBS, CORNS,
KICKS, ETC.**

Baths twice a day with oil. Use on sprains, swellings, still joints too. At dealers for 25 cents. Etc.

UNION THOMAS ELECTRIC OIL

THE TILLERS

Prairie Post

FOAM LAKE, Sask.—District residents reported that coyotes in large numbers have been playing havoc with muskrat colonies on the lake shores.

Successful Hunt

RAYMOND, Alta.—In one two-hour night about a light airplane, 17 coyotes were shot and killed in this district recently.

Looking Upward

BURNABY, B.C.—Lifting of present restrictions so that commercial buildings may be erected as high as the owner wishes is one of several changes recommended by the town planning commission. At present height of all buildings here is limited to three storeys.

IT'S A BARGAIN!—Bargain hunters will covet Barbara Mansson, 18, as she admires a \$35,000 chinchilla coat bought by her father for her for \$500 at a Chicago auction sale of the famous Inland fur. The 78-year-old widow of utility magnate Samuel Insull declared that the garment had been rarely worn and had cost more than \$10,000 in storage charges.—Central Press Canadian.

Baseball Tourney
Dates Announced

MELVILLE.—Dates for three of Saskatchewan's biggest baseball tournaments were set recently at a meeting presided over by Jimmy Robinson of Indian Head, Canadian commissioner of the National Baseball congress.

It was decided to stage Foam Lake's annual tourney on July 6-9, followed by Kamuska Elks' event on July 10-11. The Indian Head classic, the model for all tournaments, will be held July 16-17.

Delegates from the three centres discussed means of improving the baseball setup in Canada. Mr. Robinson explained the National Baseball congress program in Canada and invited the affiliation of all tournaments.

Predictions
Of World
Crop Prospects

ROME, Italy.—Predictions of world crop prospects for 1951-52 have been made by the United Nations Food and Agriculture Organization. They are listed below:

Grains—A slight increase over last year. In coarse grains a slight reduction is expected.

Rice—A considerable gain in production may be shown if the widespread crop failures of the last two seasons are not repeated.

Sugar—A world record crop may be harvested this year. More than likely last year's record production will be reached.

Livestock Products—Meat and dairy products will have about the same output as last year.

Fisheries Products—There will be an increase in the catch because of increased catching capacities of various countries.

Fats and Oils—An increase in production is expected.

Fruit—An increase in citrus fruit production is expected and a moderate increase in dried fruit is forecast.

Coffee—An increase in production is forecast. It is thought possible the low point in Brazilian output has been passed and the outlook is improved.

Tea—Expansion of tea area in several areas indicates ample supplies.

Cocoa—Production will increase and may surpass the 1949-50 record.

Tobacco—An increase is expected. Cotton—A considerable production increase is predicted. The world carryover is very low.

Wool—Production will increase slightly, but the total supply is expected to be below the previous year. This is because governmental stocks which were released in previous years have been exhausted.

Hard Fibers—A significant increase in output of hard fibers is expected.

The crop will be much bigger than any postwar crop if conditions continue favorable, and may even exceed the prewar average.

Forest Products—Sawwood and wood pulp production is expected to remain about the same as last year.

Do You Know That...

Water covers 72 per cent of the earth's surface, and in some parts deeper than the highest mountains.

GETTING UP
Getting you Down?

If morning finds you only half rested, still weary, it's time to take a little help. When your kidneys get out of order, your sleep usually suffers. To help your kidneys regain a normal condition, use Dodds Kidney Pills. Dodds' helps the kidneys get rid of poisons, and excess acids in your system. Then your muscles disappear and you feel rested, alert and ready for work or play. Get Dodds' Kidney Pills today. 1-27

Dodds Kidney Pills

They're Simple—and
Simply Delicious
with MAGIC

MAGIC RAISIN SCONES

Mix and eat into bowl, 1½ c. once-sifted pastry flour (or 1½ c. once-sifted hard-wheat flour), 3 tps. Magic Baking Powder, ¼ tsp. salt. Cut in 4 c. the chilled shortening and mix in ¼ c. washed and dried raisins and ¼ c. lightly-packed brown sugar. Combine 1 c. low-fat milk, ¼ c. milk and a few drops almond flavoring. Make a well in dry ingredients and add liquids; mix lightly with fork, adding milk if necessary, to make a soft dough. Knead for 10 seconds on a lightly-floured board and pat out into round pie plates (7½" top, 6½" bottom) and bake in 6½" deep wedges. Bake in hot oven, 425° about 18 minutes. Serve hot with butter or margarine. Yield—8 scones.
